

Supply Chain Management Solution

brings you to a new level of supply chain management

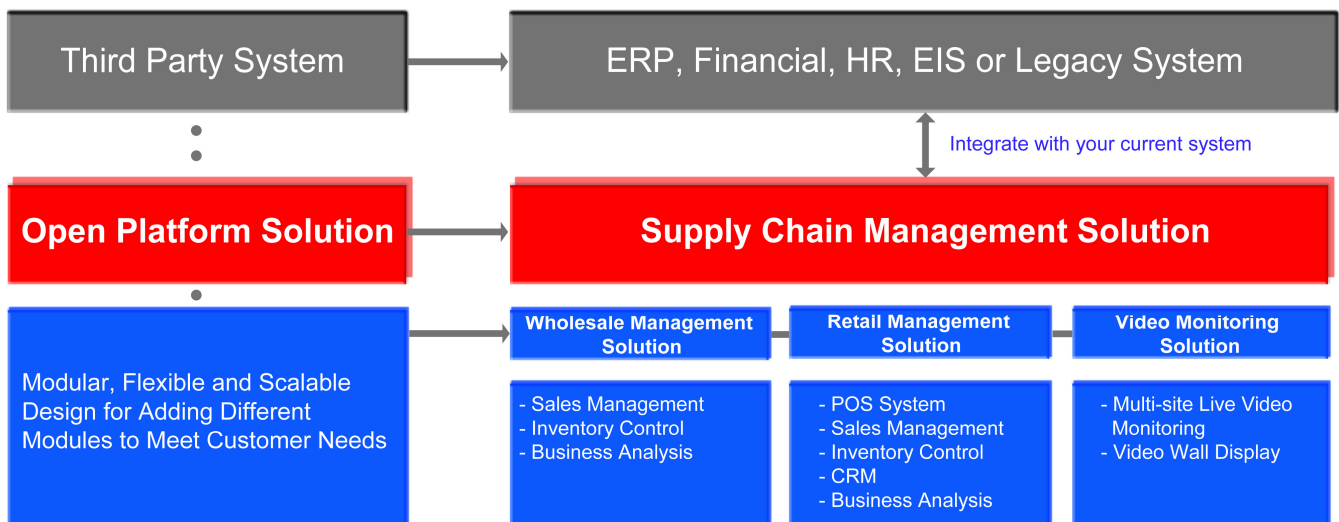

What Netideas Offers

Our supply chain management solution is an Internet-based platform to meet the needs of wholesalers, distributors and retailers to manage procurement process, logistic, inventory as well as retail shops, warehouses and branch offices. Our solutions allow you to standardize business processes for better business operation and management.

The solutions integrate point of sale (POS), inventory control, sales management and business analysis functionality. The flexible and scalable architecture enable customization to fit the specific needs of different customers.

Incorporating cloud-computing technology, customers can benefit from low initial investment and total cost of ownership, fast deployment of our solutions and better security control. You can have centralized real time data management to monitor your business anytime, anywhere.

Supply Chain Management Solution Configurations

Netideas Supply Chain Management Solution

Features

Real Time Business Management

- Provide up-to-date business information and generate reports real time for evaluating business performance in order to take any remedial actions immediately.

Centralized Management Anytime, Anywhere

- All of the business data are processed real time and can be accessed via Internet anytime, anywhere to monitor performance instantly and increase management efficiency.

Standardized Business Processes

- Offer standardized, optimized and automated business processes to improve overall performance of your business.

Easy-to-use User Interface

- The intuitive user interface makes your staff improve working efficiency while POS module supports touch screen function to streamline operation.

Comprehensive Analysis Report System

- Generate, preview, print and export sales trends, sales through, customer purchase history, promotion performance, gross profit, inventory up-hold and many more to evaluate overall performance of your business.

Flexible and Scalable Architecture

- Integrate into different solutions such as ERP, Financial, EIS, HR, legacy, etc.
- Save the cost of replacing existing systems and maintain standardized and unique business information and processes.
- Scalable architecture to meet your business growth from single store to multiple store. No system upgrade is required to save the cost and time of upgrading the solution.

Advanced Technology

- Built on Java 2 Enterprise Edition (J2EE) Standard, enabling secure, robust, scalable, multi-platform features.
- Powered by Oracle Database and WebLogic Server that maximize availability and security.

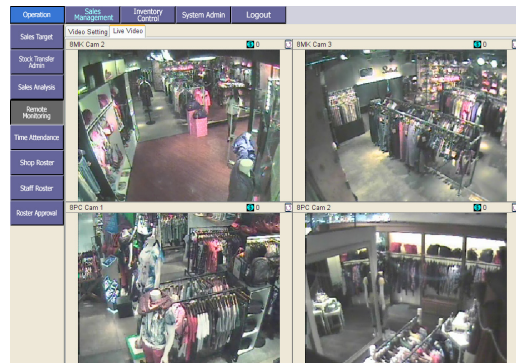

Benefits

Utilize Our Expertise

- We have over 10 years of experience in developing easy-to-use, secure and stable supply chain management solution.

Increase Management Efficiency

- Provide real time business information, comprehensive analysis reports and remote live video monitoring which save time to run around of the shops in different regions.

▲ Video Monitoring Module

Improve Staff Performance

- User-friendly and comprehensive solution makes your staff manage and implement business processes effectively and efficiently.

Reduce Operation Cost

- Monthly rental scheme (Software as a Service) minimizes the total cost of ownership and system maintenance. You can effectively utilize your resources to invest in core business.

Enhance CRM

- Record customer information and purchase history for sales and marketing staff to analyze consumer behaviour and develop suitable promotional campaigns.

Strengthen Competitiveness

- With lower operation cost and higher efficiency, you can stand out from the competition.

Facilitate Business Growth

- Management processes are being simplified to make your staff focus on how to drive the business growth.
